DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment and drawing correction filed 5 December 2005.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The application has been amended as follows:

The amended abstract as provided by the attorney was not provided on a separate sheet of paper. The examiner is attaching as "Appendix I" the clean copy of the abstract on a separate sheet of paper.

Allowable Subject Matter

3. Claims 1-60 are allowed.

The following is an examiner's statement of reasons for allowance:

The best prior art of record fails to specifically teach the limitations as set forth in the claims. For example, the best prior art of Ramberg et al. (U.S. Patent No. 6,398,105, from hereinafter "Ramberg") teaches that scanned data from a multitude of scanning options (i.e. barcode readers, magnetic stripe readers) can be routed to different applications within a network, however, does not teach the specific limitations of obtaining supplemental information about an object identifier and utilizing multiple patterns and rules for the data. Hence the best prior art of record fails to teach the invention as set forth in claims 1-60 and the examiner can find no teaching of the specific computing device system, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response of paper number filed 5 December 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Appendix I: Abstract

Please replace the paragraph on page 52 beginning below the subheading "ABSTRACT OF THE DISCLOSURE" with the following rewritten paragraph.

-A computing device for processing object identifier data corresponding to an object identifier includes a processor and memory in electronic communication with the processor. Instructions are stored in the memory. The instructions are executable to implement a method that involves obtaining the object identifier data. The method also involves obtaining supplemental information about the object identifier. The supplemental information identifies a symbology of the object identifier. The method also involves matching the object identifier data with a first pattern associated with a first rule that comprises first instructions and also with a second rule that comprises second instructions. The method also involves using the symbology of the object identifier to determine which of the first rule and the second rule are applied to the object identifier data.-
